

# Power Apps Introduction – Sample Course Outline

Duration: Two Days

This course is for you if you want to learn how to design and build business apps without writing code by dragging and dropping elements onto a canvas.

## What will be covered?

- ✓ Planning data models
- ✓ Creating apps using the canvas
- ✓ Customising the app
- ✓ Integration with Teams and SharePoint
- ✓ Saving and publishing apps

## Features covered

### Getting started with Power Apps

- What are Power Apps?
- Understanding the difference between canvas, model-driven and portal apps
- Planning and preparing a data model for your app project using Lists

### Creating a new app

- Creating a canvas app from data
- Adding pages
- Adding controls
- Creating calculated controls, input forms and data lists

### Customisation

- Adding filters
- Modifying the app's appearance
- Adding a trigger to a Power Automate flow
- Creating expressions

### Publishing and integration

- Testing your app
- Publishing and sharing
- Integration with Power BI, SharePoint sites and Teams channels
